## **How a “Stay-at-Home Dad” Makes \$30,000 a Month in Passive Income By Uploading Tiny 25-Page Word Documents Into Amazon Kindle...**

*Even During This Economic Crisis...*

There's 3 types of income.

The type of income you have will dictate how you'll survive an economic crisis. Just like we're in right now.

So here are the different types of income...

**#1 - Earned Income** - This is where most people get their income from. It's "working for money". It's also the type of income that's taxed the heaviest. The middle class works for this income.

**#2 - Portfolio Income** - This is the income you get from stocks or dividends. It's also the type of income that's taxed the second-heaviest, right after earned income.

**#3 - Passive Income** - This is where the [rich get their income](#) from. It's also the type income that's taxed the least. Best of all, it doesn't require you to work for it. When you have passive income, you make money while you sleep.

In other words, you don't work for money, money works for you.
